## SORTEX E Optical Sorters

**Safest products in your packs.**

The **SORTEX E** range of optical sorters are designed for flexibility; sorting a wide range of both food and non-food commodities.

From vegetable sorting to nut sorting, berry sorting to plastic sorting, the SORTEX E range of optical sorters increases product safety, ensures the highest product quality and maximises yields.

### SORTEX E1C

Latest addition to the range, the SORTEX E1C is designed for applications such as nuts, beans and plastics and is engineered to satisfy current hygiene requirements set by the food industry, particularly within the nut sector.

### SORTEX E1A

Developed for the fruit and vegetable packing line to remove challenging foreign material such as plastics, wood and cardboards. The high detection efficiency ensures that products are safe, clean and yields are maximised.

### SORTEX E1D

Developed as a colour and shape sorter, used directly after the freezer tunnel in the frozen vegetable and berry processing lines, for the efficient removal of gross and subtle blemishes.
