

VFFS MICRO

VERTICAL PACKAGING MACHINE

REDUCED DIMENSIONS, HIGH PERFORMANCES

Vertical Form-Fill-Seal machines to create bags starting from a reel of thermo sealable film.

Compact sizes, machine can be used also with manual loading.

Applications: coffee, biscuits, snacks, grains, bakery, pasta, rice, candies, confectionery, chocolate, technical products, flours, pet food.

Construction

Painted steel

Stainless steel AISI 304 product floating areas

Anticorrosion treatment mechanical components

Antivibration adjustable feet

Upon request version in painted or stainless steel

Fully managed by PLC Siemens S7 1500

Speed control by touch screen

User friendly easy format change

Receipts menu

Interface feeding and dosing automatic systems.

Built-in scales support to reduce dimensions.

Independent sealing temperature adjustment of the three sealing jaws through PLC.

Film transport three phase motor + inverter with self-centering belts.

Preset film centering system

Self adjustable breaking film system

Encoder to set the bag length

End film sensor

VFFS MICRO

VERTICAL PACKAGING MACHINE

REDUCED DIMENSIONS, HIGH PERFORMANCES

Technical Features	VFFS MICRO
Kind of packaging	Pillow stand up or square bottom with sharp or round corners
Max reel width/diameter	440 mm / 300 mm
Max packaging height:	390 mm
Materials:	laminated PPL, AL/PE, Paper/PE, PE and coex PP
Mechanical output:	Up to 35 bags min. (depending on kind of material and packaging length)
Voltage/power supply:	400 V 3Ph+N / 380 - 440 – 60 Hz
Max installed absorption:	2 Kw
