

3 × HS-20A Refrigerated Compressed Air Dryers
Capacity: 2.0 m³/min each
Power supply: AC 220V / 50Hz
Current: 2.5A
Dew point range: 2–10°C
Manufacturing date: July 2022
Serial/Factory No.: XS-20220713-004 (one unit photographed)

ZGZHONL Industrial Screw Air Compressor

- **Motor power:** 15 kW (approx. 20 HP)
- **Air delivery:** 2.3 m³/min
- **Working pressure:** 8 bar (0.8 MPa)
- **Motor speed:** 2,950 rpm
- **Manufactured:** May 2022
- **Features:** Digital control panel, emergency stop button, enclosed metal cabinet.

Feng Jiang Jun branding (风将军); vertical cylindrical air receiver, identified on the plate as a simple pressure vessel; capacity of 0.6 cubic metres (600 litres); design pressure of 0.84 MPa (8.4 bar); hydrostatic test pressure of 1.26 MPa (12.6 bar); design temperature of 150°C; vessel weight of 116 kg; main construction material specified as Q345R steel; and manufacture date of March 2022. The vessel has domed ends, support legs and connection ports, together with a metal identification plate and a Chinese-language safety label incorporating an installation diagram. These specifications are transcribed from the photographs and should be verified against the original plate during.

WE HAVE 3 MACHINES:

Industrial Cup / Container Sealing Machine – Six-Position System

Unused industrial packaging machine with six sealing heads and a conveyor system with circular container holders.

Key features:

- Six-position sealing configuration.
- Metal frame with stainless-steel exterior panels.
- Touchscreen control panel.
- Two digital temperature controllers.
- Transparent protective enclosure.
- Emergency stop button.
- Pneumatic components.
