MODEL YEAR 2023 / AVAILABLE NOW

PhotoRobot

Centreless Table 1300 Kit

Versatile automated photography for still-image sets, repeatable product views and 360° rotations.

Choose 2, 4, 6, 8 or any number of still images per product. Elevated and angled views are also possible. Includes a 24-inch M1 iMac and five broncolor Siros studio flashes.

SOFTWARE VALID FOR THE BUYER THROUGH OCT 2027

Ø 1,300 mm
Optical glass turntable

5 × SIROS
broncolor studio flashes

iMac M1
24-inch · 16 GB RAM

Any number of images. Your choice.

Shoot 2, 4, 6, 8 or more images per product, tailored to the item and the sales channel. Higher camera positions add useful top-angle detail views alongside traditional 360° presentations.

Image sets of any size

From a pair of views to extensive image sets: select the number of images needed for each product.

Additional viewing angles

Higher and angled camera positions reveal contours, surfaces and details from above.

Consistent catalogue output

Repeatable workflows help keep lighting and viewpoints consistent across products, variants and ranges.

1,300 mm
Glass turntable diameter

up to 40 kg
Manufacturer payload rating

≤ 0.1°
Minimum rotation step

4.5 sec
Fastest full 360° turn

Specifications according to PhotoRobot for the CL1300.

Professional lighting and an iMac included.

Five broncolor Siros studio flashes with stands and light modifiers, plus a 24-inch Apple iMac (M1 chip, 16 GB RAM), are included. A practical equipment package for efficient product photography.

5 ×

broncolor Siros

Professional studio lighting for clean product images and consistent production batches.

Pro

Controlled lighting

Flexible positioning for crisp contours, balanced reflections and premium surfaces.

1 ×

Apple iMac 24-inch

M1 chip and 16 GB RAM for managing and reviewing product image sequences.

FLEXIBLE IMAGE QUANTITIES. CONSISTENT IMAGE QUALITY.

Built for repeatable, scalable imaging.

For studios, e-commerce teams, manufacturers, brands and professional imaging providers.

INCLUDED EQUIPMENT

01 **PhotoRobot Centreless Table 1300 Kit**
Optical glass plate and motorised rotation system

01 **Apple iMac 24-inch**
M1 chip · 16 GB RAM

05 **broncolor Siros studio flashes**
Including lighting stands and modifiers

- **Choose the right number of views**
  2, 4, 6, 8 or more images - tailored to each product, rather than limited to a fixed set.
- **Reveal more product detail**
  Higher and angled viewpoints make shapes, materials and product features easier to see.
- **Scale across entire catalogues**
  Repeatable workflows suit large ranges, variants and regular product updates.

IDEAL FOR

Online shops, catalogues, marketplaces and 360° viewers - from selected still images to comprehensive product sequences.
